The Splinter Group at the Historic Moraga Barn

We would like to invite you to our upcoming Splinter Group meeting of contractors, architects, designers, entrepreneurs and leaders of our community. The topic of this event is "Green Transformation". We will be focusing on the current shift towards sustainability within our company, industry and economy as a whole. We will explore the development of both current and future technology. Our speakers will be challenging the way we think about sustainability, and will present business, design and humanistic solutions to the challenges we face.

As an industry we have the opportunity and responsibility to affect change. The Splinter Group is imbued with a spirit of dedication and perseverance to raise the standards and attitudes throughout our industry. We believe our experience in the many fields of ecologically-minded construction, management, and design must be shared.

Parking Available on Country Club Drive and Viader Drive.

SESCO Electrical, Inc.
